Interim Summary

Area is a land/gravel/vortex interface

for BK
dam

water is bounded by land & may be moving but not so very slowly. Climate is warm & fairly dry. There may be more than one structure present, but there is one primary structure

for Bk
Soviet link
Int'l activities
& espionage

Site is involved in monitoring, observing + reporting on developments, states + conditions, levels of awareness, + state of readiness of a specific demographic area + social groups (i.e., nation or population etc.). Intent seems to be "early warning, + trend analysis, tailoring of "covert operations," etc. Monitors + covert but reports - perhaps via satellite link - to an overt collection + operation center a very great distance away, perhaps even transoceanic. Site is located "amongst" the targeted area or population. Overt site is in "home" territory.
